

Contender Series Spare Parts

Contender™ Series is a new quality part offering made for non-Metso crushers. These parts are designed to fit and perform with premium third-party crushers such as Sandvik crushers. Many parts in the series have improved safety features and extended operational life.

Quality parts by know-how

Contender™ Series quality parts are made for non-Metso crushers. With other high-quality Metso parts, the Contender™ Series provide a one-stop-shop for all crusher parts, no matter which machine you use.

Benefits

- High quality parts design using our know-how.
- Enhanced parts offer improved safety, easier maintenance for reduced downtime and longer life.
- Warranty and quality based on our Nordberg® OEM know-how combined with knowledge from our heritage brands Allis-Chalmers and Svedala.
- Fast delivery from stock for the most common and needed parts.

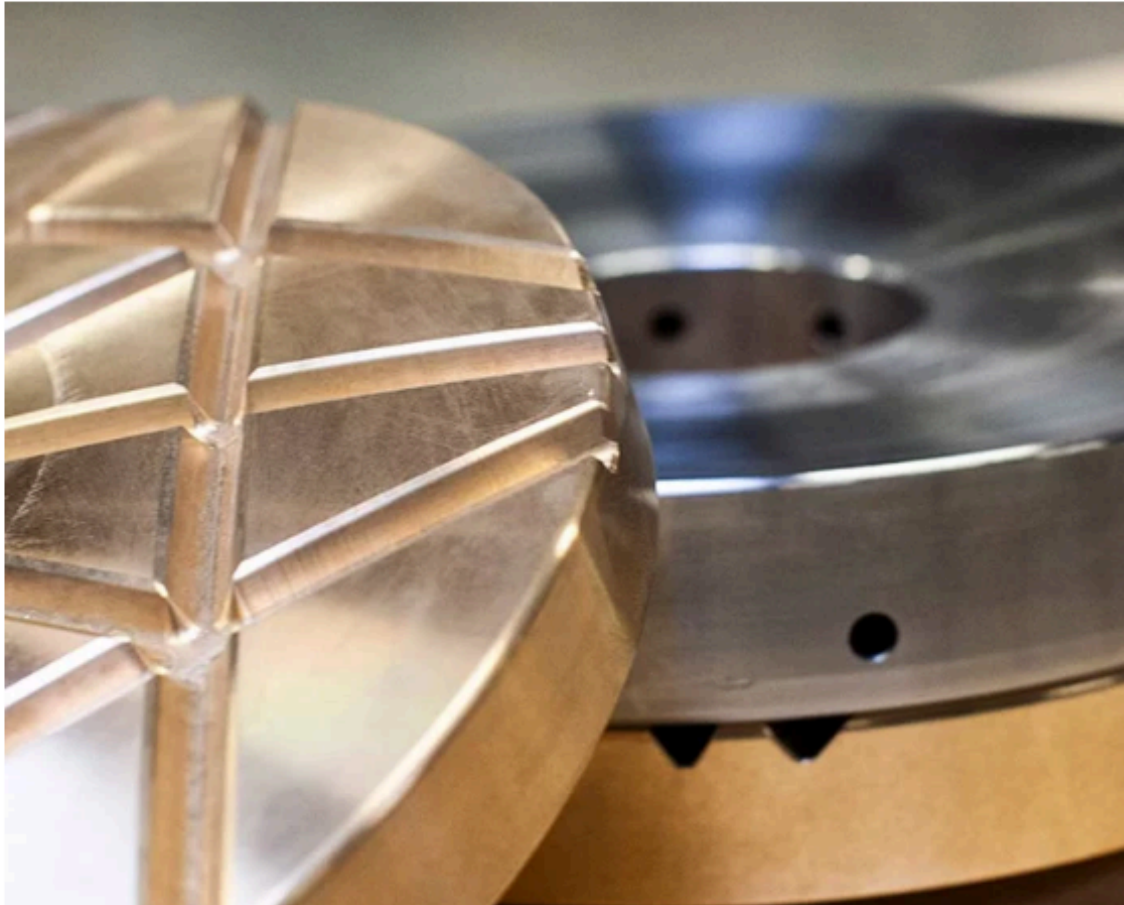

Improved safety and quality

Aggregate producers and miners often seek to optimize their crusher maintenance. Using parts that last longer and make maintenance easier and safer can have a big impact on bottom line.

The Contender™ Series parts are developed with quality suppliers and materials, ensuring that the highest standards and the strictest tolerances are met.

By understanding all the various factors that impact your crushers' operating performance, we are always looking to make improvements. For selected parts, additional enhancements have been made such as adding extra lifting points for safer change outs or using improved materials and alloys for longer parts life.

Lower risks with crusher parts

Optimized maintenance is a key competitive advantage for an aggregate or a miner producer.

Dealing with multiple service providers and brands can become a significant risk as response times, quality and inventories vary across suppliers.

For crushers, it's the parts that ensure operational uptime; they enable the crusher and the process to keep ongoing.

Would it be beneficial to have one premium partner to provide parts and services for all your crushers? We say it is something to consider, but only with the right partner.

Extended offering

With over 100 years of crushing experience, we understand how parts fit and function within a crusher for maximum performance.

We have taken an OEM approach to the design and fabrication of quality parts for both Metso and non-Metso crushers.

Now our capabilities have been extended to also offer premium parts, including all needed service, maintenance and capital parts for Sandvik, FLSmidth and Thyssenkrupp crushers.

Our wide-ranging distributor network and distribution centers ensure you can find the part you need when you need it and at the lowest total risk.
