

## Punch Plate Screens

Advanced Engineering Group can provide a large range of perforated metals and there are almost no limitations to the design, shape and metal type that can be provided.

Profile shapes include round, square, rectangular, hexagon/diamond and slotted. Hardox, Bissaloy and Mild steel options all available. If we don't already have a drawing for you machine, we can easily have one drawn up its that simple.

**Advantages of correct apt type, steel type and steel thickness for the job:**

- Get Longer Screen Life
- Excellent Screening Frequency
- Less Chance of Blinding
- More Accurate Screening
