

# Metso

The right fit at the right price

## Reliant crusher spare parts

Application

Reliant spares are a focused parts offering centred on high consumption spare parts at an affordable price.

The Metso Reliant spares are the ideal combination of function, durability and value. Offered to customers who want value and security that only OEM can provide – at a price that makes sense for their operations.

Reliant spares are developed with OEM know-how, and with the understanding that customers must have options and not all customers share the same values regarding spare parts. Reliant spares are warranted\* and backed up by Metso's world-class service and support systems.

The Reliant spare parts offering includes the most important operational spares for your Metso crusher. Customers can trust Metso to provide an alternative spare part that fits the needs of their operations requirements and budget. These spare parts are a safer and more reliable alternative to third party parts, and are warranted by the OEM fit and function. With this new and reliable offering, there is no longer a need to take risks related to using non-OEM spare parts.

**Why are Reliant spares a better choice than non-OEM spares?**

The simple answer is that these spares are designed by Metso engineers to fit and perform for your operation. Research, engineering and subtle design differences have made these parts fit-for-function - allowing a higher performance than 3rd party suppliers provide - that you and your Metso crusher can rely on. By using Reliant spares, you also get access to our unique experience, knowledge and expertise in crushing\*\*.

\* EPS warranty is not in the Reliant spares scope

\*\* Some services may require a fee

### Benefits

- Eliminates the risks often related to non-OEM spares
- Guaranteed fit and form
- Warranted free from defect
- Operational spares at an economic price

# Save money and run a more optimized operation

Reliant spares are developed with OEM know-how and with understanding that customers must have options and not all customers share the same values regarding spare parts. The Reliant spare parts are available for customers who want OEM benefits in their crusher spares but at a price that makes sense for their operations.

The Reliant spare parts offering includes some of the most important operational spares you can use in your Metso crusher. As a customer, you can rely on Metso to provide an alternative spare part that fits your operations needs and your budget. These spare parts are a safer and more reliable alternative to third party parts, and are warranted by the OEM in fit and function.

With a commitment to ensure that Reliant spares will grow with our customers, new parts are being added regularly so customers can rely on Metso to provide alternative, affordable spare parts.

## WHY ARE RELIANT SPARES A BETTER CHOICE THAN NON-OEM SPARES?

The simple answer is that these spares are designed by Metso's engineers to fit and perform for your operation. Research, engineering, and subtle design differences, have made these parts fit-for-function, allowing a higher performance than 3rd party suppliers provide, that you and your Metso crusher can rely on.

Metso understands that not all jobs require parts to last for many years. Some jobs are finite, or contract-based, and spare parts for these jobs need to be affordable but also be dependable to ensure the crusher will not be harmed or the warranty voided. These are warranted\* spare parts and backed by Metso's world-class service and support systems.

## Machined parts

Reliant spares and machined parts are made to get our customers back up and running. Machined Reliant spares are quality checked and guaranteed to fit and perform in your machine, offering the perfect balance between affordability, quality and longevity.

## Hydraulic parts

Reliant spares hydraulic parts include commonly replaced or repaired components that will get your equipment back up and running. These hydraulic components will perform for your operation and the affordability offered by Metso means you will not have to compromise your peace of mind.

## Bronze parts

Reliant spares bronze parts are centrifugally cast with metallurgy that is both forgiving and lasting. These bronze parts are offered within the Reliant family of spares because we know that our customers' operation of their machines and bearing surfaces are integral to the health of their equipment.

## Benefits

- Eliminates the risks often related to non-OEM spares
