

Trellex TS

Our rubber panels take advantage of unique compounds and designs, maximizing the inherent properties of rubber in mining applications:

Features & Benefits:

- Energy Absorption
- Noise reduction- 50% reduction compared to steel
- Available in a wide range of sizes and apertures (square, slotted round and customised apertures available)
- Unique patented aperture designs optimised throughout and minimise blinding
- Various fixing options
- Longlife and consistent product quality
- Customised hardness ranges available to optimise performance

All Panels are produced with a mild steel frame and spring steel reinforcing between apertures to:

- Prevent panning/dishing
- Improve the flexibility of the panel
- Reduce pegging and blinding
