Polyurethane Tension Screen

AEG Polyurethane tension screens are made of highly wear resistant polyurethane and are available in a range of grades and hardness's for differing applications, all with tailor made steel reinforcements. When required.

Polyurethane screens are recognised as one of the best and most versatile materials for screening surfaces for the following reasons:

Longer life when screening materials such as quartz, silicon, sand, gravel etc

Polyurethane exhibits the characteristic elasticity of rubber

Accuracy of the cast apertures

Precise screening

Outstanding wear resistance

Increased service life

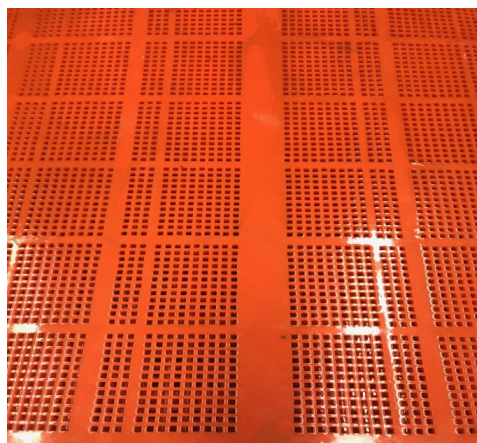

Reduced noise emissions

Good self-cleaning properties

Exact sizing

Cost effective
